

Introduction to Catalyst IT

AN OVERVIEW OF OUR GROUP AND SERVICES

Who we are

▶ Leading open source and e-learning specialists.

Catalyst IT is a multi-region IT services group that provides enterprise-level technical support for open source software. Open source means freedom from licence fees, freedom from vendor lock-in and, most importantly, freedom to innovate.

Committed to open source and the freedom that it gives our clients, we have long-established partnerships with open source technology companies and are Premium Moodle Certified Partner since 2004, Premium Drupal Supporting Partner since 2008 and Platinum Totara Learning Partner since 2010.

In support of our cloud services, we are also a certified Amazon Web Services Consulting Partner.

With 350 specialists globally, including 200 Totara, Moodle, Mahara, Laravel and React developers, we are well positioned to provide custom solutions and service to enterprise level and growing organisations.

Our clients include major universities, colleges and other higher education providers. As well as Government and major organisations in the health, not-for-profit and commercial sectors.

Our contributions to the Moodle and the broader open source community have been recognised with multiple awards over the last few years.

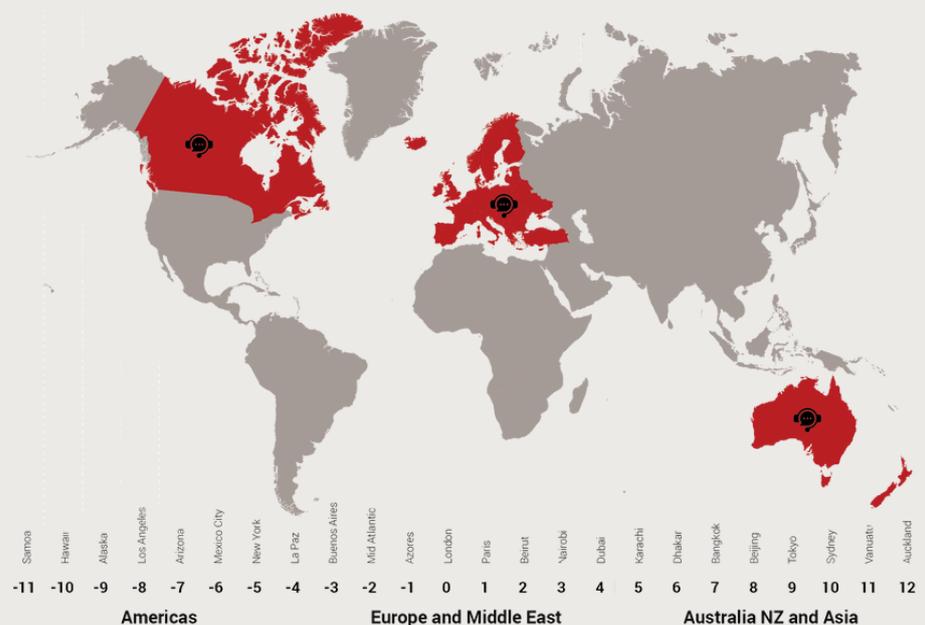

Catalyst IT Australia are **ISO27001** certified.

Founded in
1997

Experts in open source development, cloud migration and cloud performance optimisation, Catalyst was first established in New Zealand in 1997. We now have locations across Australia, Europe, UK and Canada.

Together, we are able to provide 24/7 'Follow-the-sun' support to our clients.

Catalyst IT Services

The Group's heritage lies in custom development and performance optimisation of Learning Management Systems (LMS) and Content Management Systems (CMS). Our full range of services includes:

OPEN SOURCE DEVELOPMENT

Delivering enterprise-level open source development projects for over 20 years, we have the technical breadth and depth to extend, optimise and create full custom developed solutions to meet your organisation's goals. Our team works with a range of frameworks including Laravel and React.

SSO & SYSTEMS INTEGRATION

Integrating open source solutions with established business systems to make your environment truly enterprise. We can help you streamline access, improve engagement, reduce technical debt and build cyber resilience.

DESIGN

Standard open source solutions tailored to represent your business, your brand and build User Engagement. We can help reinvigorate your LMS or CMS.

CLOUD HOSTING & FULL MANAGED SERVICES

Professional migration, cloud hosting and performance optimisation on AWS. Our global managed services team provide 24/7 Follow the Sun support for the ultimate assurance in reliability, scalability and cyber security – built upon our proven cloud architecture.

OPEN SOURCE CONSULTING

Our extensive experience will support you to make informed decisions faster. Whether it's selecting the best open source solutions that meet your business needs, supporting your organisation's open source initiatives, open source strategy development or planning and project management, the trusted team at Catalyst can help.

LEARNING MANAGEMENT SYSTEMS

Award winning technical expertise for open source LMS platforms including Moodle and Totara. We are trusted by leading universities to manage implementations, migrations, integrations as well as provide full managed services.

E-LEARNING CONSULTING

Leverage our in-depth knowledge of LMS to make the most of your platform. Our dedicated team of e-learning consultants support clients day-in-day-out, we understand what it takes to deliver successful outcomes for educators, administrators and their students.

E-ASSESSMENT

A comprehensive service to ensure the digital transformation of your paper-based exams and assessments to fully support your students and your academic staff. From how to structure and value questions in an assessment through to live exam support, our experts can help you every step of the way.

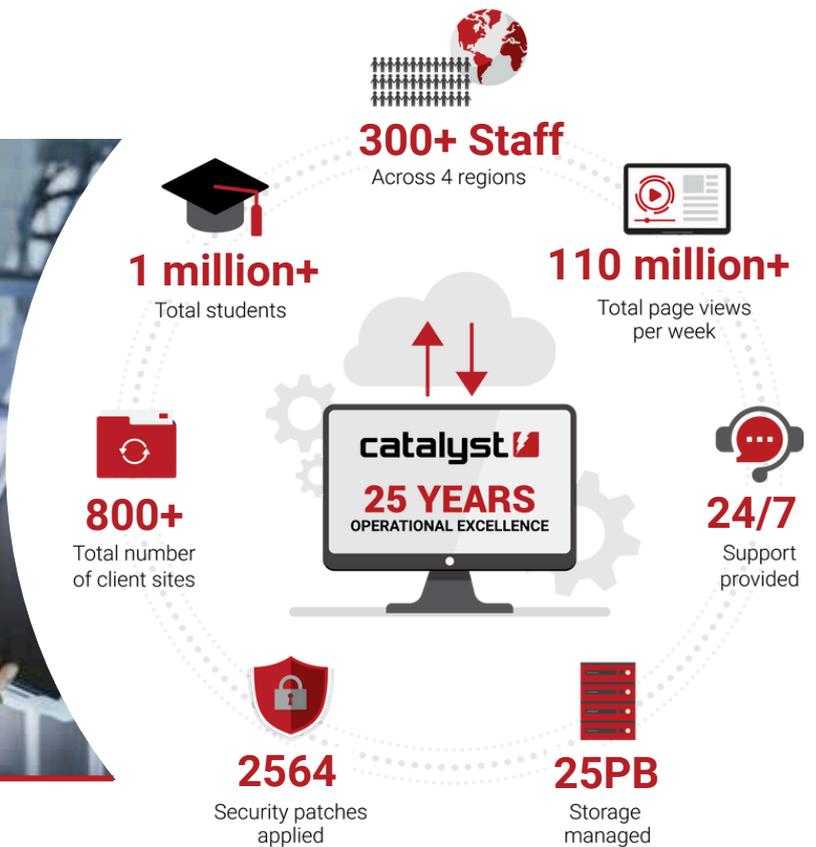

MEC - Moodle Education Certificate

Catalyst certified MEC facilitators deliver the MEC program. A six month course designed for experienced Moodle educators, the MEC helps to develop, demonstrate and evidence digital competencies using Moodle.

E-COMMERCE for Education

We deliver seamless integrations between our clients learning management systems and e-commerce solutions.

Who Trusts Us

Whilst our heritage lies in e-learning solutions, we now work with a wide range of enterprise-level clients across a number of industries - from major higher education providers to Government and not-for-profit organisations; on a local, national and multi-region basis.

Government of South Australia
South Australian Fire and
Emergency Services Commission

WHAT OUR CLIENTS SAY

“ The Catalyst Team took away the technical challenge and worry of managing 40+ Moodle sites and delivered an educational tool for Navitas staff and educators, to focus their attention on achieving learning outcomes and business goals rather than day-to-day technical administration.” Chris Foley, CTO Navitas

“ With a target audience of 300,000 school staff nationally, we couldn't have afforded to deliver this online training without the cloud. Now we have users signing on at a rate of 5,000 to 10,000 a month, and the system doesn't blink.” Chris Kilham, University of Canberra - Associate Professor of Education and Project Leader

Please see our [website](#) or ask us about Project Sheets for individual case studies.
